

Class Check-In iPad

Setup takes about **10 minutes**, once. After that students just tap their name.

Set up the iPad (once)

1. Connect to the gym Wi-Fi. Open **Safari** (the blue compass, **not Chrome**) and type this address exactly:

`wyattfulkerson11-boop.github.io/asylum-checkin/`

You should see the Asylum logo and "**Asylum Martial Arts.**"

2. Tap the **Share** button (square with an arrow pointing up) → **Add to Home Screen** → name it **Check In** → **Add**.
3. Close Safari. Tap the new **Check In** icon and leave it open for a minute on Wi-Fi. That lets it save itself so it still opens if the Wi-Fi drops.
4. Settings → Display & Brightness → Auto-Lock → Never, and leave the iPad plugged in.
5. **Required:** deleting the icon deletes every name, and a kid can do it in three taps. Settings → Accessibility → Guided Access → On, set a passcode. Open **Check In**, triple-click the top button → **Start**. Triple-click again and enter the passcode to get out.

Only ever open it from the Check In icon. Safari and the icon keep separate lists — names added in Safari won't show up in the icon.

Students

- **First time:** tap **I'm new**, type first and last name, **Save**. Only once — after that the name is a button.
- **Every class:** tap your name → tap every class you're here for → **Check in**. It remembers last time's classes, so a regular is two taps.
- **Parent with several kids:** tap **Several kids**, tap each name, then **Check in**.
- **Wrong name?** Tap **Not me**, or **Undo** on the ✓ screen. A ✓ means checked in this half of the day; classes done today show ✓.

Coaches

Tap **Coach** (bottom right) and type the coach PIN. The first time, you choose one (4–8 digits); it stays on this iPad, never written here. The coach screen goes back to check-in on its own after 2 minutes.

- **Pull, every week or two:** **Pull** → save the PDF, then **Back up now** → save that too. Save both to **iCloud Drive** or your phone, **not On My iPad**. Red = 14+ days.
- **Roster:** pick a day → **Share PDF** → AirDrop, Mail, Messages or Print. **Delete a check-in** under it fixes a mistake.
- **Date range:** any from/to dates → **Share PDF**.
- **Classes:** one class per line → **Save classes**. These are the buttons students see.
- **Students:** **Rename** fixes a typo. **Remove** takes a name off the check-in screen; past attendance is kept.
- **Backup:** **Restore from backup** puts the newest backup file back. Pull and **Back up now** first.

Good to know

Names and attendance live on this iPad only. Your copy is the files from each **Pull**. Keep them.

- **Don't delete the Check In icon**, erase the iPad, offload the app, or Clear History and Website Data in Safari settings. Each erases the names and attendance.
- Works without Wi-Fi. Only sharing by Mail or Messages needs it.
- Says **"Not saved"** or **"could not be read"**, or forgot the PIN? Tell Wyatt.
